LOCATOR OVERDENTURE ATTACHMENT

Self-Aligning Longest Lasting

*LOCATOR Patent No. 6,030,21

* Long Lasting
* Self-Aligning
* Dual Retention
* Pivoting Male
* Choice of Retention
* Extra-Radicular Design
* Money-Back Guarantee

SELF ALIGNING

The LOCATOR attachment allows a patient to easily seat their overdenture without the need for accurate alignment of the attachment components.

It is designed with a locating skirt that seats the attachment in the proper location every time, regardless of the patient’s ability. Clinical tests have proven the ability of the LOCATOR attachment to correct patient problems with inserting their attachment retained overdenture in as little as one appointment.

The self-correcting alignment of the LOCATOR attachment reduces wear and damage to the attachment components by directing the proper insertion of the appliance every time (even when the patient bites their denture into place like they say they don’t!).

INCREIBLE DURABILITY

The unique Dual Retention innovation provides the LOCATOR attachment with greater retention surface area than ever available before with other attachments.

A combination of inside and outside retention ensures the longest lasting performance we have ever seen in a dental attachment. Based upon a durability test of 110,000 cycles, the chart below shows how much longer the LOCATOR lasts when compared to other attachments (including our own ZAAG). This clearly demonstrates the incredible wear resistance of the LOCATOR attachment.
Self-locating design allows a patient to easily seat their overdenture.

PIVOTING MALE

The LOCATOR Male pivots in its permanent metal denture housing for a genuine resilient connection of the prosthesis.

The retentive nylon male remains in static contact with the female socket while its metal denture cap has a full range of rotational movement over the male. This design of the pivoting LOCATOR Male allows a resilient connection for the overdenture without any resulting loss of retention.

LOCATOR OVERDENTURE ATTACHMENT

The LOCATOR attachment is a supra-radicular design which gives you the choice of a straight post, and two angles (10 and 20 degrees) to accommodate divergent roots. Three different retentive males allow for your choice of regular retention (white), light retention (pink) or extra-light retention (blue) according to the needs of the patient.

LOCATOR with straight post, 10 degree & 20 degree
EASY TO CHANGE

The LOCATOR Implant Attachment system features a Core Tool that contains three tools in one, for easy replacement of the LOCATOR male component, and abutment insertion.
The curved Male Removal Tool portion has a hook on the end of it to catch and pull the nylon male liner out of the permanent metal housing. The middle section is the Male Seating Tool which is used to seat a replacement male into the metal cap. The third part of this handy tool is the LOCATOR Abutment Driver.

WHAT CLINICIANS REPORT ABOUT THE LOCATOR

"The patient was waiting for me on my doorstep and crying out of frustration. I changed his attachment to a LOCATOR and this is the first time he can easily snap in his own denture. He couldn't be happier, and neither could I."

Jeff Kosoris, D.D.S.
Waxahachie, TX

6 Month Followup:
"This case was the proverbial ‘case from hell’ until the LOCATORS. The case has been trouble free and the patient very satisfied. There is no way I can thank you enough for solving the problem I had with this case."

Jeff Kosoris, D.D.S.
Waxahachie, TX

"The patient presented to our office with a chief complaint of not being able to retain his lower denture. We placed four LOCATOR attachments into a newly constructed denture. The results have been phenomenal. The denture is extremely secure. The patient is extremely pleased with the results."

Laurence C. Breiterman, D.M.D.
Wayne, NJ

"I removed the attachment from the denture and directly cold cured a LOCATOR in place in the mouth. It fit excellently after directly placing in the mouth. The patient was extremely satisfied."

Gary J. Blanchette, D.D.S.
Sulphur, LA
THE LOCATOR MONEY-BACK GUARANTEE

We’re so certain that you and your patient will be pleased with the LOCATOR Overdenture Attachment that we offer this simple guarantee: If you are not satisfied with any LOCATOR attachment within one year of purchase, we will refund your purchase price.

LOCATOR ROOT KIT OF 4
Contains root preparation tools and four complete attachment sets for chairside placement of the male. Available in a kit of 0 degree females, or in a mixed kit of 0, 10, and 20 degree females.
